AT THE HORSE SHOW

Unabated Success Marks the Fifth Day at the Garden.

Ponles, Stallions and Trotters Displayed on the Tanbark.

Principal Events Scheduled on To-Day's Programme.

On its fifth day, the horse show is attended by the usual crowds at Madison Square Garden. Not even the failure of Weather Man. Ipulator Bauer to keep his promises made early in the week can dampen the show's enthusiastic patrons, and the drizzling rain this morning only made the line of carriages drawn up along Madison avenue a little longer than usual.

The children had their turn again this morning, the ponies being the principal attraction. They came out in harness, singly and in pairs, and were in most cases driver by their small owners. Afterwards there was some pony riding, in which the boys were given an opportunity to distinguish them

The judging of cab horses and green hunters made up the forenoon programme. After the recess the trotters were brought

out. Some of them were driven in harness and stallions were exhibited with several of their progeny. This event brought out Mambrino King, Chimes and Quartermaster. The later judg-

ing included roadsters, brougham horses and An attractive programme is provided for the evening entertainment, when tandems will be exhibited driven by their owners, and there will be some high jumping by the

champion hunters.

The horses are bearing up well under their confinement, considering the little exercise they get.

They seem to know just what is expected of them, and to realize the important particley play in the big show.

The intelligence of their faces is atrikingly brought out in the accompanying aketches made of some of them by an Evening World artist.
